Mabel — Asset Specifications

Mascot, Icon & Wordmark export guide for the design uplift

Generated April 16, 2026 — Reference document for asset production

1. MabelMascot — Full Body Character

The full-body mascot is the hero visual element. It appears at multiple sizes across the app, always loaded from a single `MabelMascot.imageset` asset and scaled down via `.resizable().scaledToFit()`.

WHERE IT'S USED

SCREEN	DISPLAY SIZE	CONTEXT
Welcome (hero)	260pt	Centered hero, largest instance
Library (greeting header)	140pt	Left-aligned next to greeting text
My Stories (empty state)	80pt	Centered, with helper text below

EXPORT SPECIFICATIONS

SCALE	MINIMUM WIDTH	FILENAME
@1x	260px	`mabel-mascot.png`
@2x	520px	`mabel-mascot@2x.png`
@3x	780px	`mabel-mascot@3x.png`

> **Format:** PNG with transparent background.
> **Aspect ratio:** Preserve the character's natural proportions — SwiftUI uses `.scaledToFit()` so it will letterbox within the frame.
> **Rendering:** `.renderingMode(.original)` — original colors are preserved, no tinting.
> **Recommendation:** Design at @3x (780px wide minimum) and export downscaled versions for @2x and @1x.

DESTINATION PATH

`Mabel/Mabel/Assets.xcassets/MabelMascot.imageset/`

---

2. MabelIcon — Circular Head Crop

A cropped head/face version of the mascot, displayed inside the `MabelWordmarkLockup` component (icon + wordmark text) on screens 2–8. The image is clipped to a circle in code.

WHERE IT'S USED

COMPONENT	DISPLAY SIZE	CONTEXT
MabelWordmarkLockup	28pt circle	Top of Setup, RecordingSetup, Recording, ChapterReview, MyStories, Profile

EXPORT SPECIFICATIONS

SCALE	SIZE (PX)	FILENAME
@1x	28 × 28	`MabelIcon.png`
@2x	56 × 56	`MabelIcon@2x.png`
@3x	84 × 84	`MabelIcon@3x.png`

> **Format:** PNG with transparent background.
> **Shape:** Export as a square — the circle clip is applied in code via `.clipShape(Circle())`.
> **Content:** Head/face crop of the mascot, centered within the square. Leave a small margin so the face doesn't touch the circle edge.
> **Minimum source:** 84px (the @3x size) — but 252px+ recommended for future-proofing.

DESTINATION PATH

`Mabel/Mabel/Assets.xcassets/MabelIcon.imageset/`

---

3. AppIcon — Home Screen & App Store

The iOS app icon displayed on the home screen and in the App Store.

EXPORT SPECIFICATIONS

SIZE	FORMAT	NOTES
1024 × 1024px	PNG	No transparency, no baked rounded corners

> **No transparency:** iOS requires opaque app icons — use a solid background color.
> **No rounded corners:** iOS applies the superellipse mask automatically.
> **Background:** Solid brand color or white — whichever showcases the mascot best.
> **Content:** Mascot head or simplified mark that reads well at 60×60pt (smallest home screen render).

DESTINATION PATH

`Mabel/Mabel/Assets.xcassets/AppIcon.appiconset/`

---

4. MabelWordmark — Logo Text

The "Mabel" text logo, used at the top of every screen. This is an image asset, not rendered as a Text() view.

WHERE IT'S USED

COMPONENT	DISPLAY HEIGHT	CONTEXT
MabelWordmark	24pt	Standalone on Welcome and Library top bars
MabelWordmarkLockup	24pt (alongside 28pt icon)	Screens 2–8 top bars

EXPORT SPECIFICATIONS

SCALE	HEIGHT (PX)	FILENAME
@1x	24px tall	`mabel_type.png`
@2x	48px tall	`mabel_type@2x.png`
@3x	72px tall	`mabel_type@3x.png`

> **Format:** PNG with transparent background.
> **Rendering:** `.renderingMode(.original)` — preserves original colors.
> **Width:** Flexible — determined by the text proportions. Height is the fixed dimension.
> **Current state:** Only @1x exists today. If redesigning, export all 3 scales.

DESTINATION PATH

`Mabel/Mabel/Assets.xcassets/MabelWordmark.imageset/`

5. Color Reference

Key brand colors the mascot should harmonize with:

TOKEN	HEX	USAGE
background	`#FFFFFF`	Screen backgrounds (mascot sits on white)
backgroundAlt	`#f8f4f2`	Alternate sections, card input fills
primary	`#2E7D6B`	CTAs, links, icons, section labels
primaryLight	`#f0faf7`	Icon circles, badge backgrounds
accent	`#f9e269`	Decorative only — mascot glow, highlights
text	`#2d2c2b`	All text
borderWarm	`#e8e0da`	Card borders
burgundy	`#A3243B`	Recording state, destructive actions

> **Banned colors:** No orange (#ed7d3c), no old peach (#F3E0D2), no old teal (#1F7A6F), no pure black (#000000).

---

6. Export Checklist

When the final mascot design is ready, export these files:

MABELMASCOT (FULL BODY)

- ☐ `mabel-mascot.png` — @1x, 260px wide minimum, transparent PNG
- ☐ `mabel-mascot@2x.png` — @2x, 520px wide, transparent PNG
- ☐ `mabel-mascot@3x.png` — @3x, 780px wide, transparent PNG

MABELICON (HEAD CROP)

- ☐ `MabelIcon.png` — @1x, 28×28px, transparent PNG
- ☐ `MabelIcon@2x.png` — @2x, 56×56px, transparent PNG
- ☐ `MabelIcon@3x.png` — @3x, 84×84px, transparent PNG

APPICON

- ☐ `AppIcon.png` — 1024×1024px, opaque PNG, no rounded corners

MABELWORDMARK (IF REDESIGNING)

- [ ] `mabel_type.png` — @1x, 24px tall, transparent PNG
- [ ] `mabel_type@2x.png` — @2x, 48px tall, transparent PNG
- [ ] `mabel_type@3x.png` — @3x, 72px tall, transparent PNG

> **Total files:** 7 minimum (3 mascot + 3 icon + 1 app icon), up to 13 if wordmark and icon also change.
> **Delivery:** Drop files into the corresponding `.imageset` directories and the asset swap takes ~30 seconds.
